PROFILE

Third-year IT student at Singapore Polytechnic on the Project INC pathway, building and shipping full-stack web applications for real industry clients. Experienced across the Software Development Lifecycle — from database design and API integration to responsive frontend delivery — with a focus on solutions that address real business needs. Comfortable working in Agile development teams, managing stakeholder communications, and taking ownership from brief to deployment.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Java, Swift

Frontend: React 18/19, Vite, Tailwind CSS, React Router, TanStack Query, Responsive Design

Backend: Node.js, Express 5, Flask, REST APIs, API Integration, JWT, bcrypt, Prisma ORM

Databases: PostgreSQL, MySQL, Database Design

Testing & DevOps: Playwright, Unit Testing, GitHub Actions (CI/CD), Vercel, Render, Git, Version Control

Cloud & Tools: AWS, Postman, Figma, Prompt Engineering, Agile / Scrum (SDLC)

PROJECTS

LabScriptor — *React 19, Node.js/Express 5, PostgreSQL, Python/Flask, faster-whisper, GitHub Actions*

Assistant Team Lead (Agile) · Industry Client Project, Singapore Polytechnic

Web-based lab workspace enabling students to complete laboratory sessions hands-free using real-time voice recognition — spoken words are transcribed, matched against configurable trigger commands, and auto-saved so students can focus on the experiment.

- Served as Assistant Team Lead across the full Software Development Lifecycle — authored technical documentation, conducted user testing and onboarding, managed stakeholder communications, chaired meetings, and maintained meeting minutes
- Built the full lab management system for lecturers: category and lab creation, bulk student enrolment with lab assignments, and a student dashboard tracking submission history
- Implemented authentication and role-based access control with full CRUD for lecturer and admin accounts
- Developed the chemical inventory module with voice-driven stock deduction and Excel export for integration with an external Electronic Laboratory Notebook system
- Maintained CI/CD pipeline with GitHub Actions and Playwright end-to-end tests; deployed on an internal server

Digital Audio Guide System — *React, Node.js/Express, PostgreSQL, Playwright, GitHub Actions, Azure*

Industry Client Project · Project INC, Singapore Polytechnic

Full-stack digital audio guide system for an industry client. Visitors browse exhibits, scan QR codes for audio content, and earn engagement badges — admins manage exhibits, user roles, and AR features through a dedicated platform.

- Designed and implemented role-based authentication for Manager and Content Manager roles, configuring granular permissions per role across the admin platform
- Built AR exhibit features: admin toggle to enable/disable AR per exhibit, and visitor-facing AR scanning surfacing contextual digital pop-ups — integrating QR code scanning into the visitor experience
- Developed a customisable visitor profile page with consent management and a badge showcase for tracking engagement across exhibits
- Maintained CI/CD pipeline with GitHub Actions; application deployed on Azure

CINQ — *React + TypeScript, Node.js/Express, PostgreSQL, Prisma ORM, JWT, Playwright, Vercel, Render*

Solo Project

Full-stack cinema booking system with an interactive real-time seat selector, responsive movie listings, and booking management — plus an admin dashboard for managing movies, halls, showtimes, and seat layouts.

- Implemented authentication and RBAC with JWT to cleanly separate customer and admin flows, following secure API integration patterns throughout
- Built with TanStack Query for server state management, Multer for image uploads, and Playwright for unit and end-to-end testing; frontend on Vercel, backend on Render

Wine Fridge Guide — *React 18, Vite, Tailwind CSS, Express, Prisma ORM, PostgreSQL, JWT, Vercel, Render*

Solo Project

Responsive full-stack web app for bar staff to browse an animated fridge, view tasting notes and pitch scripts, and manage a live drink catalog — with JWT-authenticated admin controls for drag-to-reorder slots and full CRUD on inventory. Frontend on Vercel, backend on Render.

EDUCATION

Diploma in Information Technology (Project INC) · [Singapore Polytechnic](#)

Apr 2024 – Apr 2027

Project INC — industry-integrated curriculum delivering software solutions for real clients through Agile development

International General Certificate of Secondary Education (IGCSE) · *Pride International School Myanmar* · *2021 – 2023*

EXPERIENCE

Sales Associate · [TabletSG](#)

Aug 2024 – Present · Singapore

- Diagnosed and resolved customer software and device issues across diverse user profiles, strengthening technical troubleshooting and communication skills
- Advised customers on mobile device selection based on technical specifications and individual needs, demonstrating clear technical communication to non-technical users
- Processed purchases, instalment plans, and contract documentation accurately, supporting smooth sales operations

Server & Bartender · [Middle Child Bar](#)

Jul 2025 – Present · Singapore

- Delivered high-volume customer service across server and bartender roles, adapting communication style to a diverse clientele
- Managed stock operations including receiving, inventory counting, and replenishment to support efficient bar operations

Ticketing Officer · [Gardens by the Bay](#)

Oct 2024 – Jun 2025 · Singapore

- Operated digital ticketing and membership management systems, handling database updates, registrations, and redemptions with accuracy
 - Provided frontline customer support on events and promotions; collaborated with team to manage operations during peak periods
-

CO-CURRICULAR ACTIVITIES

Operations Sub-Committee · [Apple Developer Society, Singapore Polytechnic](#)

2025 – 2026

- Mentored participants with no coding experience through a one-week Nano Bootcamp, guiding them to build and ship an iOS app in Swift — developing technical communication and teaching skills
 - Supported event operations and logistics for developer-focused programmes
-

LANGUAGES

English (Fluent) · Burmese (Native)
